Crawler Dozers

D155AX-8

Outstanding productivity & fuel economy

- Automatic transmission
- Torque converter with auto
- lock-up
- Adjustable idle shutdown
- Ergonomic joystick controls
- Electronic control powertrain
- Operator comfort and safety

Powerful

Komatsu Crawler Dozer

Powerful

Set by default, the D155-8 has a highly efficient transmission that automatically matches the best gear mode in all dozing operations and includes a travel speed preset function to reduce work time and fatigue for the operator. With Komatsu's ECMV (Electronic Controlled Modulation Valves) gear changes are smoothly timed to always keep the power transfer at maximum efficiency.

First-Class Comfort

First-Class Comfort

Operator comfort is essential for safe and productive work. The cab on the D155-8 is quiet and comfortable, an ideal environment to concentrate on the job. Its hexagonal design and large tinted glass windows offer excellent panoramic visibility. The high capacity and fully automatic climate control sys-

tem pressurises the cab to keep dust out. A high quality sound-absorbent lining covers the interior to minimise noise levels for the operator.

Safety First

Komatsu Crawler Dozer

Safety First

The redesigned ROPS/FOPS integrated cab and the well-located operator seat give optimal blade visibility to the left and right and make both dozing and grading easy, safe and fast. To further improve safety and ripping efficiency, the special shape of the fuel tank gives the operator a clear view of the ripper point and of the dozer's back side.

Environmentally Friendly

Komatsu Crawler Dozer

Environmentally Friendly

The Komatsu EU Stage V engine is productive, dependable and efficient. With ultra-low emissions, it provides a lesser environmental impact and a superior performance to help reduce operating costs and lets the operator work in complete peace of mind.

Easy Maintenance

Easy Maintenance

Self-diagnostic monitor

The multifunction monitor panel displays the running time, engine revs, fuel level and water coolant temperature in real time. It also provides the operator with maintenance and service information, if oil filters need replacing or any abnormality occurs. In addition, it supplies Komatsu mechanics with detailed information, with no need for external service tools.

KOMTRAX and Komatsu Care

Komtrax™ (/en/komtrax) is Komatsu's state of the art wireless monitoring system. It gives you an easy way to track your machines, monitor their performance and stay up to date about the status of your equipment. Knowledge gained from KOMTRAX saves you time and maximises your profits.

Komatsu CARE™ (/en/komatsu-care) is a maintenance program that comes as standard with your new Komatsu machine. It covers factory-scheduled maintenance, performed with Komatsu Genuine parts by Komatsu-trained technicians.

Environmental data

Environmental data

Komatsu has committed to halving CO2 emissions from 2010 levels by 2030 and we will work to achieve net zero CO2 emissions (carbon neutrality) from our production activities by 2050. In addition, we will deploy the relevant technologies at material suppliers and other partners to help them also achieve carbon neutrality in their operations.
