Overview

Service and support

Meeting the demands of waste management

The toughest waste conditions require the best equipment. Designed with field experience and customer feedback, our dozer waste solutions offer ample pushing power and special filters and guards that provide protection from environmental debris.

Designed to protect vital machine parts

Improved protection from airborne debris

Reduced wear on components

## Features and benefits

### Auto reversing fan

Minimize overheating from airborne debris with fan that auto reverses

### Engine pre-cleaner

Keep your engine clear with a pre-cleaner that blocks and removes large

### Extra guards throughout

Help protect your machine from damage

based on adjustable interval and duration.

particles from the air before they reach the engine air filter.

and contamination due to debris with extra guards added to final drive seals, tanks and engine.

### Track shoe holes

Reduces track compacting by allowing debris to be pushed through the track shoe holes.

### Re-located A/C condenser

Increase cooling efficiency with a re-located A/C condenser that's mounted to the roof to protect it from debris.

### Trash rack

Your operator needs a wide range of vision while moving piles of waste. The trash rack was designed for optimal operator visibility with increased blade capacity.

### Front and rear striker bars

Reduce debris from riding up on the tracks and damaging the chassis with front and rear striker bars.

Support you can count on

Financing

Financing can be a major advantage for your operation, enabling you to get the equipment and service you need with terms to fit your balance sheet. Take advantage of competitive and flexible financial tools with Komatsu financing.

Warranty programs

Experience the peace of mind that comes with Komatsu’s warranty. Komatsu offers a standard warranty on all machines — plus extended coverage options that help extend the life of your investment.

Training programs

Our instructors offer operator, technical, service, and technology training and provide plenty of supporting materials for equipment operation, maintenance, and service.
